

Module 2: The Bitcoin Education Foundation Resources

Helpful Resources for Teachers

Below are curated links provided by The Bitcoin Education Foundation to support educators using Module 2 of the curriculum. These resources offer helpful background and student-friendly explanations to support classroom learning about the limitations of traditional money systems.

1. Why Traditional Money Fails — And What Bitcoin Fixes (Blog Article)

This article explains the key weaknesses of fiat currencies and how Bitcoin offers an alternative. It pairs well with classroom discussions on inflation, government control, and the evolution of money.
